

## Security, Redundancy, and Efficiency are FirstLight Hallmarks

FirstLight's 12 colocation and data centers are located throughout the Northeast and offer managed IT services, colocation, disaster recovery, data storage, scalability, and tech support.

Data centers are at the heart of ensuring availability and redundancy for modern enterprises. By leveraging FirstLight's facilities, organizations can use the space within their IT departments in a smarter, more strategic way.

FirstLight data centers can improve the most important metric that every modern IT organization is judged by: uptime. Our data centers have security, redundancy, and access to a 14,000-route-mile network owned and managed by FirstLight. Furthermore, FirstLight offers a number of cloud solutions and managed services to support your data computing needs.

## FirstLight's Portfolio of Data Centers/Colocation Facilities

FirstLight operates 12 geographically-diverse facilities with redundant, diversely routed Internet connections up to 10Gbps with low latency due to intelligent caching and peering.

- Albany, NY
- Brunswick, ME
- Bangor, ME
- Portland, ME
- Portsmouth, NH (2)
- Romulus, NY  
(including bunker space for new construction)
- Keene, NH
- Manchester, NH
- Lebanon, NH
- Burlington, VT (2)

### Features
