

## Too Good to be True

The old saying if it's too good to be true, it probably is applies to telecom as well. Right now several companies are offering Free Conference Calling or other adult chat services. What they haven't told you is that the way they make money is a scam being perpetrated on the public and this scam is having an unfair impact on our cost of doing business. These companies are partnered with phone carriers that have exorbitant costs for call termination. That means that every time you make a call to their telephone access number, they are charging a very high amount per minute to us (or any phone company) to deliver that call. These companies are purposely driving high volumes of call traffic to these areas by offering free services. As an effort to stop this abuse of the system, Oxford Networks has decided to charge twenty (20) cents per minute for calls to these high-cost areas. It certainly is not our preference to carve out an exception to our flat rate offering, but we hope that as our client you will understand why it is necessary to do this. In order to keep our costs low for everyone, we cannot allow the free conference calling malpractice to continue without consequence. Please consider this as our notice to you that calls to these areas will be billed at 20 cents per minute. For more information please contact our client services staff at 1-800-520-9911.
