

The evolving security threat landscape has created a need for a new type of IT security service designed to identify and respond to advanced threats before they compromise an entire network.

FirstLight has partnered with Trustwave to offer our customers a SOC-as-a-Service solution that provides the people, process and technology necessary to detect, contain, and remediate complex IT security issues.

Cybersecurity does not have to be reactive. Through access to Trustwave's Advanced Security Operations Centers (ASOCs), FirstLight customers are protected around-the-clock by a team of highly skilled security professionals. The SOC team relies on honed data collection and analytical methodologies alongside advanced Endpoint Detection and Response (EDR) technologies to identify, contain, and remediate network threats.

FirstLight SOCaaS:

- Provides 24x7 threat detection and response
- Offers real-time root cause analysis, attacker containment and remediation
- Delivers continual application of industry-leading cyber threat intelligence
- Leverages Trustwave global SOC's and 250+ security professionals
- Tiered service offers the addition of proactive manual threat hunting as emerging threats are identified
