- **Customer Base:** We proudly serve carriers and business customers with our robust portfolio of communications solutions
- **Service:** We have consistently received the NYS Public Service Commission's commendation for exemplary customer service
- **Financing:** Portfolio company of Antin Infrastructure Partners

Our Network

FirstLight has been building and operating its own fiber network, including fiber to the premises systems, for over 20 years with roots going back a century. The network has approximately 25,000 route miles, more than 15,000 on-net locations with access to more than 125,000 locations in six states, with connectivity to Montreal. In our key markets, we have significant fiber density to ensure that we can offer a comprehensive solution that addresses all locations. FirstLight's core data and switching platforms are designed for maximum availability to ensure that our services meet or exceed our stated Service Level Agreements (SLAs).

Support

FirstLight combines advanced, proven technology with a staff experienced in the design, construction, deployment and operation of high quality communications networks. FirstLight's senior management team has over a century of direct and related experience. FirstLight's project managers, engineers, technicians, and support personnel continuously monitor, maintain and augment the network to provide the high quality service and support our customers expect. FirstLight's geographically diverse Network Operations Centers (NOCs) are strategically located with locally-based support personnel situated throughout our footprint for prompt response. FirstLight team members pride themselves on superior service with the understanding that our clients' mission-critical communications demand comprehensive, proactive support.

Reliable, Scalable, Cost-Effective Services

FirstLight offers a full complement of advanced fiber optic telecommunications and related services that enable our customers to thrive in the digital age.

Data Bandwidth

Ultra high-speed, low latency, scalable data transport solutions up to 100 Gbps including Ethernet, Wavelength and TDM (DS1, DS3 and OCx).

Unified Communications

Cloud-based unified communications, with the full-feature functionality of a PBX, eliminates the need to purchase and maintain your own phone equipment and provides access to the communications tools you need to seamlessly operate.

Internet

Dedicated symmetrical connections delivered over our own fiber optic backbone with robust Tier 1 provider connections and hundreds of private peering points.

Dark Fiber

FirstLight's fiber-to-the-tower and fiber-to-the-premises solutions ensure your business has access to virtually unlimited bandwidth and the ability to choose the protocol best suited to support your business applications.

Data Center/Colocation

Combines the security and disaster recovery of off-site servers with redundant, diversely routed Internet and private network connections for the continuity of your mission-critical business operations.

Managed Services

FirstLight offers a number of managed services and monitoring solutions including network monitoring, server monitoring, application hosting, managed network and firewall, and a number of as-a-service offerings.

Cloud Computing

Companies are moving to the cloud to gain efficiencies, reduce costs, and improve uptime. FirstLight has the cloud computing infrastructure and services to make cloud computing a reality.

Hardware

FirstLight partners with elite technology providers to offer a full suite of hardware including security devices, routing, switching, wireless networking, and telepresence technology.

FirstLight's clientele includes national telecommunications providers, CLECs, and leading enterprises, including healthcare organizations, high tech manufacturing and research facilities, financial institutions, law firms, colleges and universities, K-12 schools, public safety agencies, as well as local and state governments.
