

Security That Protects Your Business, From Every Angle

Stop chasing threats, juggling vendors, and wondering what you're missing. FirstLight delivers a complete, managed approach to security, so your business stays protected, compliant, & operational.

1. ON-NET PROTECTION

First line of defense for traffic on your network

DDoS Protection

Keep your business online during attacks

- Always-on mitigation
- Protection without the performance hit (Secure Internet)

Secure Internet DNS Protection

Block malicious and risky domains before connections are made

- Simple, effective protection for offices and on-net environments
- No software required

2. INFRASTRUCTURE AND ACCESS

Secure and control how your network connects and communicates

SD-WAN

Secure, reliable connectivity and performance

- Application-aware routing
- Built-in security
- Consistent policy enforcement

Network Security

Control, segment, and secure traffic across your environment

- Managed Firewall
- Access control
- Policy enforcement

3. DATA PROTECTION AND RESILIENCE

Protect your critical business data – & recover quickly from ransomware or disruption

Backup & Disaster Recovery

-  Servers, databases, and on-prem systems
-  Microsoft 365 (Outlook, SharePoint, OneDrive, Teams)
-  Google Workspace (Gmail, Drive, etc.)
-  Salesforce and other SaaS platforms

- ✓ Protect data not fully covered by native SaaS retention
- ✓ Immutable backups to defend against ransomware attacks
- ✓ Rapid recovery to minimize downtime and business impact
- ✓ Ensure business continuity across any environment

4. YOUR ENVIRONMENT, FULLY INTEGRATED

Flexible by design. Use your security tools, ours, or a combination of both.

Use FirstLight Provided Solutions

- XDR - Extended detection & response across endpoints, network and cloud
- EDR - endpoint detection & response
- Managed firewall, SIEM, network devices and email security

—OR— Bring Your Own Stack

- EDR, SIEM, firewalls, email security
- Identity providers & access management
- Endpoints, servers, network devices
- Cloud workloads, Microsoft 365

Either way, our SOC has you covered. Centralize visibility, detection and response, no matter what's in your environment.

Managed SOC
(Powered by Cyflare)

Full visibility and response across your environment

24x7 monitoring, detection, and response

Real-time threat containment

Continuous vulnerability identification

Reporting and visibility when you need it

Stronger Outcomes for Your Business

Stay compliant and audit-ready

Meet industry requirements and support cybersecurity insurance with confidence

Reduce risk and eliminate vulnerabilities

Identify gaps and strengthen your defenses continuously

Detect and respond to threats in real time

Stop attacks before they spread

Protect your users, data, and network

Cover every layer of your environment—not just one piece

Get 24x7 protection without the overhead

No need to build or staff your own SOC

Why FirstLight

Security solutions shouldn't operate in silos. With FirstLight, your network, security, and support are designed to work together so that you get stronger protection and faster response.

One provider across network and security

No vendor runaround

Responsive support

Built for performance and reliability
