

Detect & Stop Threats Before They Spread

Get 24x7 monitoring, detection, & response, without building your own Security Operations Center.

>>> THE CHALLENGE

Most organizations don't have the time, tools, or staffing to:

- ⚠ Monitor threats around the clock
- ⚠ Investigate suspicious activity
- ⚠ Respond quickly enough to stop attacks

That's where risk grows.

>>> THE SOLUTION

Managed SOC (Powered By Cyflare)

FirstLight delivers a fully managed Security Operations Center that monitors your environment, detects threats, and responds in real time, so you don't have to.

Managed SOC

Expert-led detection, response, and defense, around the clock.

Firstlight Managed SOC (Powered By Cyflare)

Integrate the security tools you already have, automate what your team cannot keep up with, and reduce risk fast. Backed by Cyflare's SOC and 24/7 analysts, with over 400 integrations and 450 proven playbooks, FirstLight delivers managed security that eliminates vendor lock-in, accelerates automation, and produces compliance-ready reporting so you can scale without slowing the business.

40%

AVERAGE COST REDUCTION

Reduce cybersecurity spend. Run a leaner security operation.

98%

TRUE POSITIVES

Cut the noise. Detect real threats, not false alarms.

98%

AUTOMATED REMEDIATION

Hand the routine alerts to the SOC. Keep your team on the work that matters.

100%

FREEDOM OF TOOL CHOICE

Use our tools, your tools, or a combination of both to build the security stack you want.

How We Deliver Security Outcomes

FirstLight delivers mXDR, mEDR, VSS, mES, and CSS through Cyflare's ONE Converged Security Platform. No lock-in. No forced stack. Scalable security built for growth.

MXDR / MEDR

Detect and respond everywhere

24/7 monitoring and rapid containment across endpoints, cloud, and network.

MES

Stop phishing, stop breaches

Prevent account takeovers and email-borne threats before they reach inboxes.

VSS

Stay ahead of vulnerabilities

Protect the business with proactive scanning and risk insights you can act on.

CSS

Expert guidance, proven defense

Strengthen defenses and recover faster with customized security services and advisory.

What Makes Us Different

Open platform. Real transparency. Compliance ready.

Your Tools or Ours	Automation at Scale	24/7 SOC	Transparency	Compliance Ready
Use our solutions or bring your own with 400+ integrations.	Automate the work in-house teams cannot keep up with.	Sub-10-minute triage and unmetered VIP incident support.	Full access to the dashboards and analytics our SOC uses.	Mapped to CMMC, HIPAA, PCI, and the frameworks you report against.

Why You Should Choose Us

FEATURE / BENEFIT	FIRSTLIGHT, POWERED BY CYFLARE	OTHER MSSPS
Future-proof with bring-your-own-tools	400+ integrations. No rip-and-replace.	Proprietary stack, or lose visibility.
Transparency	Full access to the tools our analysts use.	Limited data. Pay extra for custom requests.
Cloud native	Native integrations for AWS, Azure, GCP, and more.	Limited or no cloud integrations.
Onboarding time	Monitoring in 24 hours. Full enterprise onboarding under 60 days.	90+ days.
Full environment visibility	Integrate any tool, including niche software, via open API.	Always partial visibility.
Unlimited storage	Included.	Price escalation on data volume.
Documented use cases and playbooks	450+ playbooks. We publish what we monitor, how we respond, and why.	Black-box monitoring. Limited accountability.
Pricing peace of mind	Predictable per-user and per-device pricing.	Complex data-ingestion pricing.
Unmetered incident response	24/7 support, unmetered response, sub-10-minute triage.	Basic help, then billed hourly.
Curated analytics platform	Transparent dashboards and analytics to improve your posture.	Rudimentary tactical data.

SEE IT IN ACTION

Reduce risk. Stay ahead of vulnerabilities. Stop phishing.

Work with FirstLight and the Cyflare Open SOC to strengthen defenses with incident response and advisory services. One platform. Full visibility. Compliance-ready reporting. Complete tool freedom. Talk to a FirstLight security expert today.
