INFO SHEET

Dedicated Internet Access

Your business is only as good as the network it runs on.

FirstLight gives you more: more bandwidth that's yours alone, more in-region support you can count on, and more protection built in.

Plenty of providers sell you speed on paper, then put your business on the same network as millions of homes. When the neighborhood starts streaming, your video calls freeze and the fine print kicks in. Since 1998, FirstLight has done it differently: a fiber Internet connection that belongs only to your business, routed the shortest way to where your data needs to go.

200+

Direct Network Peers + 75% of all traffic transits to source or destination network

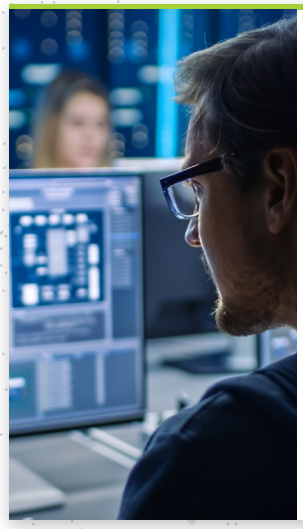

WHAT YOU GET

- **More bandwidth** – Up to 100 Gbps, sized for anything from a single office to a data center.
- **Upload as fast as you download** – Back up to the cloud, send large files, and host video calls without waiting.
- **In-region support, 24/7** – Real support from technicians in your area, any hour of the day.
- **A guarantee in writing** – Backed by an industry-leading SLA.
- **Enterprise-Grade Internet** – BGP and IPv4/IPv6 support.

INFO SHEET

Dedicated Internet Access

WHY IT'S A CUT ABOVE

- **Yours alone** – Your bandwidth isn't shared. When the business next door starts streaming, your connection doesn't slow down.
- **The shortest route** – National and global full transit peers, plus 200+ direct network connections. Translation: Real-world fast, not just fast on paper.
- **Built for uptime** – Each regional network runs on its own, with backup equipment, connections, and power, so a problem elsewhere… stays there.

DIA w/Enhanced Security

ADD ENHANCED SECURITY, BUILT RIGHT INTO YOUR CONNECTION

Most providers hand you a connection and leave the protection up to you. FirstLight's Dedicated Internet with Enhanced Security option builds two layers of defense into your Internet service:

- **DDoS Mitigation** – When attackers flood your network with junk traffic to knock you offline, we filter it so your business stays open.
- **Web Security** – It blocks dangerous and unwanted websites before a bad click turns into a breach. You decide which sites are allowed through an easy online portal.
- **Ready On Day One** – Our Enhanced Security option comes pre-configured with proven protection settings, so you're covered from day one.

Looking for even more security? Our Managed Security Operations Center puts a team of security experts on watch for you 24/7, spotting and stopping threats while your team focuses on running the business. Learn more at www.firstlight.net/security
